

# SOLUTIONS INNOVATION

CTi will play a leading role in technology and quality  
and be the leader in mold industry.

CREATIVE TECHNOLOGY Inc.

# COMPANY PROFILE

## Message from our President

**GREETING** We at Creative Technology Inc. have engaged in an array of tasks from designing to manufacturing molds of large-size automotive plastic components. We produce mass production molds and are also entering the market of large-size trial molds, molds for development and large-size limited mass production.

CTi aligns itself with the pace of a fast-moving society. We incorporate the most-advanced equipment and technologies as they are needed. We have a particularly high regard for 'manufacturing', the stage where our technology and skilled Japanese hands are merged. And we have been committed to providing high quality molds.

Starting with our launch in Canada in 1989, we have expanded our business in Thailand, China by assigning engineers to our strongholds. We promise to keep providing our customers with high-value molds and service; effectively expanding our global operational presence.

Now and in the future, CTi and our group companies would like to receive your patronage.

President : Shin Iwatsuki

## Company Profile

Company Name	Creative Technology Inc.
Address	5300-1, Nakaze, Hamana-ku, Hamamatsu City, Shizuoka
TEL	+81-53-588-3321
FAX	+81-53-588-3254
URL	<a href="http://www.cretech.co.jp">http://www.cretech.co.jp</a>
CEO	Shin Iwatsuki
Capital	JPY 70.000.000-
Established	October,1977
Annual Sales	JPY 2.400.000.000- (2014 financial result)
Number of Employees	99 ( male : 85, female : 14) As of April 1, 2025
Our bankers	Risona Bank Hamamatsu Branch Japan Finance Corporation Shizuoka Bank Hamamatsu Branch Ensyu Shinkin Bank Kasai Branch
Business Activities	Designing, manufacturing and maintenance of injection molds for high-volume production Low-cost injection molds, Simplified molds for trial, R&D mold Molded items of limited mass production and of trial

## Corporate Development

Oct.1977	Sanko Kogyo Inc. ( the predecessor of CTI ) was established in Oro, Hamakita-ku, Hamamatsu city with a capital of 5 million yen. Production of simplified molds ( with epoxy )began.
Feb.1979	The main plant moved to Kihei, Higashi-ku, Hamamatsu city. Equipment for producing large-scale simplified injection molds was introduced. Company name was changed to Nihon Puroto Inc. The capital was increased to 10 million yen. Current chairman Fumio Iwatsuki was inaugurated as a president.
Apr.1980	Precision casting of simplified molds began.
Aug.1984	The main plant moved to its present location in Nakaze, Hamakita-ku, Hamamatsu city. Introduction of equipment such as 3D CAD/CAM, large-scale machine tools, large-scale cranes etc. for manufacturing large-scale simplified molds.
Jan.1985	Operating activities of its own started.
Mar.1985	Simplified molds manufacturing began,using 3D CAD/CAM for more productivity. Second plant was constructed and improved machining facility.
Aug.1987	Software for host computer was improved to enhance the 3D CAD/CAM system.
Sep.1987	The capital was increased to 40 million yen with investment by SBIC East Japan.
Oct.1987	Introduction of large-scale injection molding machine.
Apr.1988	Mass-production injection molds began.
Jul.1988	Third plant was constructed and became a electrical discharge plant.
Jan.1989	Introduction of supersized NC electrical discharge machine.
May.1989	Acquired capital in Canada Mold Technology Inc. a joint company in Ontario, Canada when it was established. Expanded our business to automotive resin mold production and sales in North America.
Sep.1989	The capital was increased to 70 million yen.

Feb.1990	Reconstruction of the second plant for enhancement of 3D CAD/CAM system and MC intracompany LAN.
Aug.1995	Acquired capital in Korea Puroto ( now ASIS Corp.), a joint company in Gyeonggi-do, South Korea.
Oct.1998	Established Advanced Mold Technology Co.,Ltd, a joint company in Bangkok, Thailand
Sep.1999	The company name was changed to Creative Technology Inc.
Oct.2000	Established Automotive Mold Technology Co.,Ltd (AMT); an automotive resin mold production plant in Rayong, Thailand
Jul.2001	Certified according to ISO9001
Jul.2005	President Fumio Iwatsuki retired and Yoshitaka Kuno was inaugurated.
Dec.2008	Introduction of large-scale injection mold machine 3500t (Toshiba :IS3500-315A) and large-size DSP (300t)
Sep.2010	Established Creative Engineering China Co.,Ltd (CEC) in Nantong city, Jiangsu, China.
Jun.2014	President Yoshitaka Kuno retired and Atsunori Yamanaka was inaugurated.
Dec.2014	Introduction of CNC large-size 5-axis machine (Toshiba :MPH-2630B)
Jan.2015	Introduction of laser-welding machine (ALPHA :ALM200)
Apr.2015	Introduction of mold strength analysis software (CAE)
Aug.2015	Establish Indonesia Mold Technology Inc. (IMT) in Indonesia.
Nov.2015	Introduction of large-scale electrical discharge machine(Makino:EDNC207)
Oct.2017	Introduced a graphite processing machine (Makino milling machine: V33i)
Nov.2018	Introduction of large-sized gate type MC-NF4226 (VISION WIDE)
Jun.2019	President Atsunori Yamanaka retired and Fumio Iwatsuki was inaugurated.
Jun.2024	President Fumio Iwatsuki retired and Shin Iwatsuki was inaugurated.

# ABOUT US

**CTi has always committed to produce  
“molds of uncompromising quality” by skilled artisans.**

High quality molds are absolutely essential for producing a variety of plastic products.

The world of mold manufacturing may well be regarded as an ‘aid industry’ ,  
affecting the quality and perfection level of plastic products.

Under the mantra “To provide great molds as best we can” , we proactively  
incorporate advanced technology such as CAD/CAM/NC processing. At the same  
time, we attach great importance to the use of skilled human hands that render  
what our high accuracy machinery create virtually flawless.

We have international group companies located in Canada, Thailand and China.  
Not wanting to limit our services to Japan, we would like to offer our services to  
customers on a global level. We plan to expand our business to  
Indonesia in 2015.

**Mold without  
compromise**

GROUP CONCEPT

In recent years, various companies have broadened the point of production worldwide and the international movement has intensified. Under such a situation, the premises of our CTi group abroad aspire to give customers full support for their production activities not only by providing products but also by delivering better service within close proximity.
